Infernal Aura	- aura	no effect	- (2 × aura)	+ aura

SUPERNATURAL ACTIVITY ROLLS MODIFIED BY AURA

Spellcasting Rolls: The realm interaction modifier modifies the casting score.

Lab Totals: The aura modifier in the Lab Total is calculated according on the interaction table.

Ability Rolls: The aura rating affects supernatural Abilities such as Second Sight, or Wilderness Sense. Most such abilities are Magical, although in particular cases they may be Faerie, Infernal, or even Divine.

Magic Resistance: Magic Resistance is altered by the aura modifier. This includes Hermetic Magic Resistance due to the Parma Magica and Forms, as well as the resistance of creatures with Might.

Penetration: For magi and characters with mystical abilities, the aura modifies the roll to use the ability, modifying Penetration. The aura modifier does not apply to Penetration twice. Thus, a magus in a Divine aura of 2 takes a -6 penalty to his casting score. This reduces his Penetration, calculated by subtracting the spell level from the casting score. The aura modifier is not subtracted again. For mystical creatures, there is no roll to use the ability (see page 191), so the aura modifies Penetration directly.
